The articles in this volume of ARCHIMEDES examine particular cases of 'reception' in ways that emphasize pressing historiographical and methodological issues. Such issues arise in any consideration of the transmission and appropriation of scientific concepts and practices that originated in the several 'centers' of European learning, subsequently to appear (often in considerably altered guise) in regions at the European periphery. They discuss the transfer of new scientific ideas, the mechanisms of their introduction, and the processes of their appropriation at the periphery. The themes that frame the discussions of the complex relationship between the origination of ideas and their reception include the ways in which the ideas of the Scientific Revolution were introduced, the particularities of their expression in each place, the specific forms of resistance encountered by these new ideas, the extent to which such expression and resistance displays national characteristics, the procedures through which new ways of dealing with nature were made legitimate, and the commonalities and differences between the methods developed by scholars for handling scientific issues.

An international team of scholars from different academic disciplines address some of the most important issues, texts, and objects in the study of ancient magic. The volume is divided into three primary sections. The first part offers new approaches to some of the major theoretical and methodological questions in the study of ancient magic. Most importantly, the authors offer a defense of the term "magic" as a scholarly rubric in the study of antiquity. The contributors to the second part provide novel interpretations of some of the most significant defixiones, amulets, recipes and rituals from the ancient world. The essays also engage with questions of gender, materiality, visibility, and scribal practice. The final section examines the transmission of magical practice, both in antiquity and in later periods. Accordingly, the chapters in this final section allow scholars to approach the study of magic over the longue durée. By placing into dialogue the interests, concerns, and methods of scholars from diverse academic fields, this volume provides an interdisciplinary perspective to the study of premodern magic.

Jugendstil, that is Germany's distinct engagement with the international Art Nouveau movement, is now firmly engrained in histories of modern art, architecture and design. Recent exhibitions and publications across the world explored Jugendstil's key protagonists and artistic centres to firmly anchor their activities within the trajectories of German modernism. Women, however, continue to be largely absent from these revisionist accounts. Jugendstil Women and the Making of Modern Design argues that women in fact actively participated in the cultural and socio-economic exchanges that generated German design responses to European modernity. By drawing on previously unpublished archival material and a series of original case studies including Elsa Bruckmann's Munich salon, the Photo Studio Elvira and the Debschitz School, the book explores women's important contributions to modern German culture as collectors, consumers, critics, designers, educators, and patrons. This book offers a new interpretation of this vibrant period by considering diverse manifestations of historical female agency that pushed against historically entrenched conventions and gender roles. The book's rigorous approach reshapes Jugendstil historiography by positing women's lived experiences against dominant ideologies that emerged at this precise moment. In short, the book advocates women as an integral part of the emergence, dissemination and reception of Jugendstil and questions the deeply gendered histories of this key period in modern art, architecture and design.

The Weekly Notes Becker Professional Education Ltd

To achieve goals for climate and economic growth, "negative emissions technologies" (NETs) that remove and sequester carbon dioxide from the air will need to play a significant role in mitigating climate change. Unlike carbon capture and storage technologies that remove carbon dioxide emissions directly from large point sources such as coal power plants, NETs remove carbon dioxide directly from the atmosphere or enhance natural carbon sinks. Storing the carbon dioxide from NETs has the same impact on the atmosphere and climate as simultaneously preventing an equal amount of carbon dioxide from being emitted. Recent analyses found that deploying NETs may be less expensive and less disruptive than reducing some emissions, such as a substantial portion of agricultural and land-use emissions and some transportation emissions. In 2015, the National Academies published Climate Intervention: Carbon Dioxide Removal and Reliable Sequestration, which described and initially assessed NETs and sequestration technologies. This report acknowledged the relative paucity of research on NETs and recommended development of a research agenda

that covers all aspects of NETs from fundamental science to full-scale deployment. To address this need, Negative Emissions Technologies and Reliable Sequestration: A Research Agenda assesses the benefits, risks, and "sustainable scale potential" for NETs and sequestration. This report also defines the essential components of a research and development program, including its estimated costs and potential impact.

In *A Time of One's Own* Catherine Grant examines how contemporary feminist artists are turning to broad histories of feminism ranging from political organizing and artworks from the 1970s to queer art and activism in the 1990s. Exploring artworks from 2002 to 2017 by artists including Sharon Hayes, Mary Kelly, Allyson Mitchell, Deirdre Logue, Lubaina Himid, Pauline Boudry, and Renate Lorenz, Grant maps a revival of feminism that takes up the creative and political implications of forging feminist communities across time and space. Grant characterizes these artists' engagement with feminism as a fannish, autodidactic, and collective form of learning from history. This fandom of feminism allows artists to build relationships with previous feminist ideas, artworks, and communities that reject a generational model and embrace aspects of feminism that might be seen as embarrassing, queer, or anachronistic. Accounting for the growing interest in feminist art, politics, and ideas across generations, Grant demonstrates that for many contemporary feminist artists, the present moment can only be understood through an embodied engagement with history in which feminist pasts are reinhabited and reimaged.

You've heard the stories about the dark side of the internet--hackers, #gamergate, anonymous mobs attacking an unlucky victim, and revenge porn--but they remain just that: stories. Surely these things would never happen to you. Zoe Quinn used to feel the same way. She is a video game developer whose ex-boyfriend published a crazed blog post cobbled together from private information, half-truths, and outright fictions, along with a rallying cry to the online hordes to go after her. They answered in the form of a so-called movement known as #gamergate--they hacked her accounts; stole nude photos of her; harassed her family, friends, and colleagues; and threatened to rape and murder her. But instead of shrinking into silence as the online mobs wanted her to, she raised her voice and spoke out against this vicious online culture and for making the internet a safer place for everyone. In the years since #gamergate, Quinn has helped thousands of people with her advocacy and online-abuse crisis resource Crash Override Network. From locking down victims' personal accounts to working with tech companies and lawmakers to inform policy, she has firsthand knowledge about every angle of online abuse, what powerful institutions are (and aren't) doing about it, and how we can protect our digital spaces and selves. Crash Override offers an up-close look inside the controversy, threats, and social and cultural battles that started in the far corners of the internet and have since permeated our online lives. Through her story--as target and as activist--Quinn provides a human look at the ways the internet impacts our lives and culture, along with practical advice for keeping yourself and others safe online.

'Effortlessly cool, funny yet sad, breezy but thoughtful - this is an edgy and unputdownable work of modern literature' Sharlene Teo, author of *Ponti* 'Crimson is written with immense courage - there's no faking the feeling of honesty on each page. It is a brave novel reminiscent of Irvine Welsh's *Trainspotting*' Laline Paull, author of *The Bees* The island has run out of oxygen. The island is swollen. The island is rotten. The island has taken my beloved from me. The island is a Greenlander. It's the fault of the Greenlander. In Nuuk, Greenland . . . Fia breaks up with her long-term boyfriend and falls for Sara. Sara is in love with Ivik who holds a deep secret and is about to break promises. Ivik struggles with gender dysphoria as their friends become addicted to social media, listen to American pop music and get blind drunk in downtown bars and uptown house parties. Then there is Inuk, who also has something to hide - it will take him beyond his limits to madness, and question what it means to be a Greenlander, while Arnaq, the party queen, pulls the strings of manipulation, bringing a web of relationships to a shocking crescendo. Crimson weaves through restlessness, depression, love and queer experiences to tell the story of Greenlanders through a unique and challenging form. The original text was written and published in the Greenlandic language.
