She wants faith, hope, and love. She wants help and healing. She wants to hear and be heard, to see and be seen. She wants things set right. She wants to know what is true—not partly true, or sometimes true, or almost true. She wants to see Truth itself, face-to-face. But here, now, these things are all cloudy. Hope is tinged with hurt. Faith is shaded by doubt. Lesser, broken things masquerade as love. How does she find

something permanent when the world around her is always changing, when not even she can stay the same? And if she finds it, how does she hold on? She Reads Truth tells the stories of two women who discovered, through very different lives and circumstances, that only God and His Word remain unchanged as the world around them shifted and slipped away. Infused with biblical application and Scripture, this book is not just about two characters in two

stories, but about one Hero and one Story. Every image points to the bigger picture—that God and His Word are true. Not because of anything we do, but because of who He is. Not once, not occasionally, but right now and all the time. Sometimes it takes everything moving to notice the thing that doesn't move. Sometimes it takes telling two very different stories to notice how the Truth was exactly the same in both of them. For anyone

searching for a solid foundation to cling to, She Reads Truth is a rich and honest Bible-filled journey to finally find permanent in a world that's passing away. This exciting new manual presents a systematic approach to writing one form of documentation, the

SOAP note. The purpose of this text is to teach readers to write SOAP notes that will be reimbursable under Medicare, Part B, and managed care. With the current changes in healthcare, documentation of patient care is essential to meet standards for reimbursement of services. SOAP notes prepare students for real-world clinical practice, effectively teaching the mechanics

of writing problem statements and goals, and addressing documentation in different stages of treatment and practice settings. The author walks the reader through each step of the documentation process, effectively teaching the mechanics of writing problem statements and goals and addressing documentation in different stages of treatment and practice settings. Written in a

manual format, this book provides the reader with: A step-by-step “how to” approach to documenting the occupational therapy process. Skills broken down into small steps and taught individually. A format or “template” for writing problems, goals, and each section of the SOAP note. A list of common abbreviations and symbols used in documentation. Examples of notes from many practice areas and application, and then provides the opportunity for practice with exercises and examples presented throughout the book.
