She has a noble and exacting mind, a good waist, and a busted thesis project. She also has a yen for Nelson Denoon, a charismatic intellectual who is rumored to have founded a secretive and unorthodox utopian society in a remote corner of the Kalahari—one in which he is virtually the only man. What ensues is both a quest and an exuberant comedy of manners, a book that explores the deepest canyons of eros even as it asks large questions about the good society, the geopolitics of poverty, and the baffling mystery of what men and women really want.

[Finding My Invincible Summer](#) St. Martin's Griffin

Scientist and author of *The Only Woman in the Room* explores her intelligence up against social inequality in this collection of personal essays. Eileen Pollack has always had a love-hate relationship with society's rules for women and girls—especially as they were laid out for her while growing up in 1960s upstate New York. In *Maybe It's Me*, she recounts her many trials, triumphs, and misadventures as a smart woman navigating a world that is only just learning to imagine equality between the sexes. With poignant humor and candid honesty, Pollack describes her journey from high school—where she wasn't allowed to take advanced courses in science or math because she was female—to earning a physics degree at Yale; a post-graduate summer in which she was shot at and kidnapped; and a theoretically equal marriage in which she was nonetheless expected to do all the housework and child-rearing, pay the taxes, and make sure the Roto-Rooter guy arrived on time. “Maybe it's me” is a thought all

women have struggled with at one time or another. Pollack's autobiographical essays take us from intimate, humorous stories of innocent curiosity to the calculated meanness of tween girls, from the defensive strategies of threatened men to incisive examinations of how society got here. In the end, Pollack's message is one of human connection and tenacity along the unending search for love, acceptance, and equality.
