Discover the rare mola mola fish and meet the colorful inhabitants of coral reefs. Also, find out how people use the waters of the world, from sports and leisure to fishing and treasure hunting.

Senses Kingfisher

Mummies, whether they're preserved by people or nature, are a fascinating way to examine different cultures around the world. While most people know about mummies from ancient Egypt, the first mummies were made more than 7,000 years ago in South America. Anthropologists can only guess why, most likely because of a belief in life after death. Readers will be awed as they discover how different cultures perfected their mummification process. Well-chosen photographs and illustrations will reveal the incredible preserving powers of peat. Gruesome discoveries and even modern mummies are all highlighted in this book, which includes 100 facts about magnificent mummies.

DK Children's Encyclopedia Macmillan Discover Science: Mountains by Margaret Hynes Young readers are invited to climb to the highest peaks and discover why so few creatures can live at the top of the world. Along the way they will explore what exactly is a mountain, how mountains are formed—including the amazing power behind earthquakes and volcanoes, weather on mountains, and some of the great mountain adventurers. At the end they can experiment with making mountains of their own with the hands-on activities included at the back.

Kingfisher Young Knowledge Weather Tor Nightfire KFYK Deserts invites readers to explore the world's deserts, from the scorching North American deserts to the cold Gobi. Students will learn about the animals and people who inhabit these vast expanses and how we use deserts.

Kingfisher Young Knowledge Kingfisher Books

This introduction to birds explains what birds are, and looks closely at their bodies to demonstrate how they fly, feed, communicate, reproduce and raise their offspring. Readers will discover familiar and fascinating birds from all around the world and examine feathers, beaks, eggs and nests.

The Twisted Ones Penguin

When a young woman clears out her deceased grandmother's home in rural North Carolina, she finds long-hidden secrets about a strange colony of beings in the woods in this chilling novel that reads like *The Blair Witch Project* meets *The Andy Griffith Show*. When Mouse's dad asks her to clean out her dead grandmother's house, she says yes. After all, how bad could it be? Answer: pretty bad. Grandma was a hoarder, and her house is stuffed with useless rubbish. That would be horrific enough, but there's more—Mouse stumbles across her step-grandfather's journal, which at first seems to be filled with nonsensical rants...until Mouse encounters some of the terrifying things he described for herself. Alone in the woods with her dog, Mouse finds herself face to face with a series of impossible terrors—because sometimes the things that go bump in the night are real, and they're looking for you. And if she doesn't face them head on, she might not survive to tell the tale. From Hugo Award – winning author Ursula Vernon, writing as T. Kingfisher, *The Twisted Ones* is a gripping, terrifying tale bound to keep you up all night—from both fear and anticipation of what happens next.

Kingfisher Young Knowledge: Oceans and Seas Macmillan

This title is an introduction to animal homes. Readers can learn how to identify the varied habitats where animal homes are likely to be found. It also includes guidance on fun projects, such as building a model dam or

studying animal homes in the garden.

Discover Science: Robots Pan Macmillan
An Instant USA Today & Indie Bestseller A Barnes & Noble Book of the Year Finalist A Goodreads Best Horror Choice Award Nominee
From T. Kingfisher, the award-winning author of The Twisted Ones, comes What Moves the Dead, a gripping and atmospheric retelling of Edgar Allan Poe's classic "The Fall of the House of Usher." *A very special hardcover edition, featuring foil stamp on the casing and custom endpapers illustrated by the author.* When Alex Easton, a retired soldier, receives word that their childhood friend Madeline Usher is dying, they race to the ancestral home of the Ushers in the remote countryside of Ruritania. What they find there is a nightmare of fungal growths and possessed wildlife, surrounding a dark, pulsing lake. Madeline sleepwalks and speaks in strange voices at night, and her brother Roderick is consumed with a mysterious malady of the nerves. Aided by a redoubtable British mycologist and a baffled American doctor, Alex must unravel the secret of the House of Usher before it consumes them all. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
Science Kids: Maps and Mapping National Academies Press
