Brazil has famously been called a country of contradictions. It is a place where narratives of "racial democracy" exist in the face of stark inequalities, and where the natural environment is celebrated as a point of national pride, but at the same time is exploited at alarming rates. To people on the outside looking in, these contradictions seem hard to explain. Understanding Contemporary Brazil tackles these problems head-on, providing the perfect critical introduction to Brazil's ongoing social, political, economic, and cultural complexities. Key topics include:

- National identity and political structure.
- Economic development, environmental contexts, and social policy.
- Urban issues and public security.
- Debates over culture, race, gender, and spirituality.
- Social inequality, protest, and social movements.
- Foreign diplomacy and international engagement.

By considering more broadly the historical, political economic, and socio-cultural roots of Brazil's internal dynamics, this interdisciplinary book equips readers with the contextual understanding and critical insight necessary to explore this fascinating country. Written by renowned authors at one of the world's most important centers for the study of Brazil, Understanding Contemporary Brazil is ideal for university students and researchers, yet also accessible to any reader looking to learn more about one of the world's largest and most significant countries.

This is an entirely new edition of the author's 1984 study (originally published by South End Press) of radical media and movements. The first and second sections are original to this new edition. The first section explores social and cultural theory in order to argue that radical media should be a central part of our understanding of media in history. The second section weaves an historical and international tapestry of radical media to illustrate their centrality and diversity, from dance and graffiti to video and the internet and from satirical prints and street theatre to culture-jamming, subversive song, performance art and underground radio. The section also includes consideration of ultra-rightist media as a key contrast case. The book's third section provides detailed case studies of the anti-fascist media explosion of 1974-75 in Portugal, Italy's long-running radical media, radio and access video in the USA, and illegal media in the dissolution of the former Soviet bloc dictatorships.

Around the world, tourists are drawn to visit murals painted on walls. Whether heritage asset, legacy leftover, or contested art space, the mural is more than a simple tourist attraction or accidental aspect of tourism material culture. They express something about the politics, heritage and identity of the locations being visited, whether a medieval fresco in an Italian church, or modern political art found in Belfast or Tehran. This interdisciplinary and highly international book

explores tourism around murals that are either evolving or have transitioned as instruments of politics, heritage and identity. It explores the diverse messaging of these murals: their production, interpretation, marketing and - in some cases - destruction. It argues that the mural is more than a simple tourist attraction or accidental aspect of tourism material culture. Murals and Tourism will be valuable reading for those interested in cultural geography, tourism, heritage studies and the visual arts.

The study of landscapes has become so profound in its approaches that its incursion into society has confronted the scientific community with several 'views' that link a broad path across various academic disciplines. This volume offers essential insights into the concepts and applications of some emerging perspectives in this field. Instead of focusing on only organisms or nature in order to better understand the world and its development, this book places humans and physical aspects at the centre of its focus, combining practical and experimental studies on nonhuman model organisms, ecological and geographical information, nature conservation and territorial planning, and the study of humans and society.

This book presents an interdisciplinary study of the relation between semiotics, law & art. Focusing on Greimasian semiotics, it examines specific works of art (from Giotto to Banksy) that deal with the theme of justice, promoting a more sensitive and humanized perception of the values that surround law. The book offers readers a comprehensive review of the semiotics of law, critically examining the relation between law & art. It covers a variety of topics, including semiotics, law and art; semiotics, art and experience; and society, law and art, as well as semiotics, law and painting; semiotics, law and architecture; semiotics, law and theatre; semiotics, law and literature; and semiotics, law and culture. In doing so, it uses the semiotics of painting to explain the symbology of justice and its significance in history; the semiotics of architecture to explain the setting of justice; the semiotics of theatre to explain the logic of the legal process; and the semiotics of literature to explain the narrative logic of legal decisions. Lastly, drawing on the semiotics of culture, it discusses ways of promoting justice, citizenship and human rights. Written from both philosophical and semiotic perspectives, the book enhances the centrality of visual jurisprudence studies to promote a better understanding of the role of law.

Challenging prevailing theories of development and labor, Gay Seidman's controversial study explores how highly politicized labor movements could arise simultaneously in Brazil and South Africa, two starkly different societies. Beginning with the 1960s, Seidman shows how both authoritarian states promoted specific rapid-industrialization strategies, in the process reshaping the working class and altering relationships between business and the state. When economic growth slowed in the 1970s, workers in these countries challenged social and political repression; by the mid-1980s, they had become major voices in the transition from authoritarian rule. Based in factories and working-class communities, these movements enjoyed broad support as they

fought for improved social services, land reform, expanding electoral participation, and racial integration. In Brazil, Seidman takes us from the shopfloor, where disenfranchised workers organized for better wages and working conditions, to the strikes and protests that spread to local communities. Similar demands for radical change emerged in South Africa, where community groups in black townships joined organized labor in a challenge to minority rule that linked class consciousness to racial oppression. Seidman details the complex dynamics of these militant movements and develops a broad analysis of how newly industrializing countries shape the opportunities for labor to express demands. Her work will be welcomed by those interested in labor studies, social theory, and the politics of newly industrializing regions.

São Paulo pulsa, respira, sofre, geme, grita. A cidade tem uma psique que se manifesta no espaço urbano por meio do grafite, expressão simbólica da subjetividade da cultura. Esse é o ponto de partida dos autores que, em perambulação pelas ruas, nos apresentam o espaço psíquico dessa imensa polis, revelado pela arte dos grafiteiros. A subjetividade de seus habitantes, em movimento dinâmico e constante, produz o lugar onde são projetadas e vividas vicissitudes e anseios. Nossos autores viajantes flanaram por São Paulo e a descrevem revestida de afeto, dores e inspirações. Sylvia Loeb

Embodying Modernity examines the current boom of fitness culture in Brazil in the context of the white patriarchal notions of race, gender, and sexuality through which fitness practice, commodities, and cultural products traffic. The book traces the imperial meanings and orders of power conveyed through “fit” bodies and their different configurations of muscularity, beauty, strength, and health within mainstream visual media and national and global public spheres.

Drawing from a wide range of Brazilian visual media sources including fitness magazines, television programs, film, and social media, Daniel F. Silva theorizes concepts and renderings of modern corporality, its racialized and gendered underpinnings, and its complex relationship to white patriarchal power and capital. This study works to define the ubiquitous parameters of fitness culture and argues that its growth is part of a longer collective nationalist project of modernity tied to whiteness, capitalist ideals, and historical exceptionalism.

This Companion provides an authoritative source for scholars and students of the nascent field of media geography. While it has deep roots in the wider discipline, the consolidation of media geography has started only in the past decade, with the creation of media geography's first dedicated journal, *Aether*, as well as the publication of the sub-discipline's first textbook. However, at present there is no other work which provides a comprehensive overview and grounding. By indicating the sub-discipline's evolution and hinting at its future, this volume not only serves to encapsulate what geographers have learned about media but also will help to set the agenda for expanding this type of interdisciplinary exploration. The contributors-leading scholars in

this field, including Stuart Aitken, Deborah Dixon, Derek McCormack, Barney Warf, and Matthew Zook-not only review the existing literature within the remit of their chapters, but also articulate arguments about where the future might take media geography scholarship. The volume is not simply a collection of individual offerings, but has afforded an opportunity to exchange ideas about media geography, with contributors making connections between chapters and developing common themes. *Placar Magazine* Univ of California Press

This book is focused primarily on polymer nanocomposites, based on the author's research experience as well as open literature. The environmental health and safety aspects of nanomaterials and polymer nanocomposites, risk assessment and safety standards, and fire toxicity of polymer nanocomposites, are studied. In the final chapter, a brief overview of opportunities, trends, and challenges of polymer nanocomposites are included. Throughout the book, the theme is developed that polymer nanocomposites are a whole family of polymeric materials whose properties are capable of being tailored to meet specific applications. This volume serves as a general introduction to students and researchers just entering the field and to scholars from other subfields seeking information.

This book combines scholarship in pragmatics, linguistic anthropology, and philosophy to address the problem of violence in language. How do words wound? What is the relation between physical and linguistic violence? How do racial invectives, misogynous language, homophobic slurs, among other forms of hate speech, affect the body and make us vulnerable to conditions of injurability that language brings about? While investigating the limits that violence poses for everyday speech action, understanding, representation, and our shared frameworks of intelligibility, this collective volume theoretically bridges knowledge from canons in linguistic pragmatics, continental philosophy and linguistic/semiotic anthropology and the dialogic perspective of subjects who are located in the peripheries of South America and Europe. The scholarship gathered here intends to offer a perspective on the violence of words that is attentive to practices and sensibilities that do not always fit into hegemonic ideologies of self and language.

The modern metropolis has been called 'the symbol of our times', and life in it epitomizes, for many, modernity itself. But what to make of inherited ideas of modernity when faced with life in Mexico City and São Paulo, two of the largest metropolises in the world? Is their fractured reality, their brutal social contrasts, and the ever-escalating violence faced by their citizens just an intensification of what Engels described in the first in-depth analysis of an industrial metropolis, nineteenth century Manchester? Or have post-industrial and neo-globalized economies given rise to new forms of urban existence in the so-called developing world? Life in the Megalopolis: Mexico City and São Paulo investigates how such questions are explored in cultural productions from these two Latin American megalopolises, the focus being on literature, film popular music, and visual arts. This book combines close readings of works with a constant reference to theoretical, anthropological and social studies of these two cities, and builds on received definitions of the concept megalopolis. Life in the Megalopolis is the first book to combine urban-studies theories (particularly Lefebvre, Harvey, and de Certeau) with Benjaminian cultural analyses, and theoretical discussions with close-readings of recent cultural works in various media. It is also the first book to compare Mexico City and São Paulo.

updated guide helps engineers and scientists understand and use the special properties of cutting-edge polymer nanocomposites. Written by a recognized authority in the field, *Polymer Nanocomposites: Processing, Characterization, and Applications, Second Edition*, begins with an overview of key technologies and processes. Each chapter then examines a different property (structural, mechanical, thermal, flammability, ablation, and electrical) and explains relevant commercial and industrial applications. Examples for a wide variety of usage include applications for spacecraft and defense vehicles, medical and dental implants, flame-retardant and conductive polymers for additive manufacturing, and fire-resistant woven and nonwoven fabrics.

Coverage includes:

- Nanotechnology and nanomaterials fundamentals
- Applications in an expansive range of industries and commercial sectors
- Processing of multifunctional polymer nanocomposites
- Structure and properties characterization
- Mechanical, thermal, flammability, ablation, electrical, and tribological properties
- Opportunities, trends, and challenges in the field

Known around the world simply as Lula, Luis Inacio Lula da Silva was born in 1945 to illiterate parents who migrated to industrializing Sao Paulo. He learned to read at ten years of age, left school at fourteen, became a skilled metalworker, rose to union leadership, helped end a military dictatorship—and in 2003 became the thirty-fifth president of Brazil. During his administration, Lula led his country through reforms that lifted tens of millions out of poverty. Here, John D. French, one of the foremost historians of Brazil, provides the first critical biography of the leader whom even his political opponents see as strikingly charismatic, humorous, and endearing. Interweaving an intimate and colorful story of Lula's life—his love for home, soccer, factory floor, and union hall—with an analysis of large-scale forces, French argues that Lula was uniquely equipped to influence the authoritarian structures of power in this developing nation. His cunning capacity to speak with, not at, people and to create shared political meaning was fundamental to his political triumphs. After Lula left office, his opponents convicted and incarcerated him on charges of money laundering and corruption—but his immense army of voters celebrated his recent release from jail, insisting that he is the victim of a right-wing political ambush. The story of Lula is not over.

This collection promises to be a cornerstone in the field of performance studies and human rights activism. By mixing scholarly chapters with artists' manifestos or "interruptions" it promotes the idea of the collective work between academia and social movements. Not only is it very timely, theoretically savvy, and well written, it also brings together scholars, activists, artists, and activists in a very fluid, collective approach, something many of us strive to do." — Paola S. Hernández, University of Wisconsin, USA This book charts the changing frontiers of activism in the Americas. Travelling Canada, the US, the US-Mexico border, Chile, Argentina, Brazil, Cuba, Colombia, and Indigenous territories on Turtle Island, it invites readers to identify networks, clusters, and continuities of art-activist tactics designed to exceed the event horizon of the performance protest. Essays feature Indigenous artists engaging in land-based activism and decolonial cyberactivism, grass-roots movements imagining possible futures through cross-sector alliance building, art-activists forwarding tactics of reinvention, and student groups in the throes of theatrical assembly. Artist pages, interspersed throughout the collection, serve as animated, first-person perspectives of those working on the front lines of interventionist art. Taken together, the contributions offer a vibrant picture of emergent tactics and strategies over the past decade that allow art-activists to sustain the energy and press of political resistance in the face of a whole host of rights emergencies across the Americas.
