A scientific look at the skill of juggling. In this book, we look at all the things that limit jugglers and make the skill so challenging. Topics covered in the book include: juggling definitions, a brief history of juggling, juggling records, different juggling patterns and their pros and cons, Shannon's juggling theorem, physics of thrown objects and useful equations, good form, throwing error, ideal patterns, how to avoid collisions, optimizing juggling, the human limits of juggling, changing the constraints, learning to juggling, overview of "siteswap" notation, and training advice.

The Australia Directory David and Charles

Statistical illiteracy can have an enormously negative impact on decision making. This volume of collected papers brings together applied and theoretical research on risks and decision making across the fields of medicine, psychology, and economics. Collectively, the essays demonstrate why the frame in which statistics are communicated is essential for broader understanding and sound decision making, and that understanding risks and uncertainty has wide-reaching implications for daily life. Gerd Gigerenzer provides a lucid review and catalog of concrete instances of heuristics, or rules of thumb, that people and animals rely on to make decisions under uncertainty, explaining why these are very often more rational than probability models. After a critical look at behavioral theories that do not model actual psychological processes, the book concludes with a call for a heuristic revolution that will enable us to understand the ecological rationality of both statistics and heuristics, and bring a dose of sanity to the study of rationality.

Dead Balls and Double Curves: An Anthology of Early Baseball Fiction collects twenty-two classic stories from baseball's youth, presented in chronological order to capture the development of this most American of sports. Many of these tales have never before been reprinted, adding historical value to the rich literary merits of this anthology. Editor Trey Strecker's collection begins with an informal village match in an excerpt from James Fenimore Cooper's *Home as Found* (1838), published the year prior to Abner Doubleday's alleged invention of the game outside Cooperstown, New York, and concludes with the arrival of the superstar slugger that signaled the end of the dead-ball era in Heywood Broun's *The Sun Field* (1923). The sampling of fiction from the eighty-five-year interim loads the bases with the humor, realism, and athletic gallantry of the sport's earliest years. Not all grandstanding and heroism, these stories also explore cultural and class conflicts, racial strife, town rivalries, labor disputes, gambling scandals, and the striking personalities that decorated a simple game's evolution into a national pastime. *Dead Balls and Double Curves* presents a lineup of first-division writers, including Mark Twain, Frank Norris, Christy Mathewson, Edna Ferber, and the game's poet laureate, Ring Lardner, plus legendary characters such as Baseball Joe, South-Paw Skaggs, Tin Can Tommy, and the sole artiste of the mythic double curve, Frank Merriwell. Throughout the volume, each author's abiding affection for the game and its characters shines through with diamond-like focus.
