Egypt 's was the first non-Western country to undergo an industrial revolution. It was a major commercial center during the 19th and early 20th centuries. It was one of the first countries to have (albeit briefly) a constitutional government. Its struggle for independence was among the earliest in the

---

non-Western world. Its capital, Cairo, has served as a headquarters and a meeting place for nationalist leaders. Its schools and universities attracted students from many other African and Asian countries. For the Arab world, its educational and legal institutions set the pattern that most other Arabic-speaking countries have followed. Its books, magazines, and newspapers circulate widely. Its radio and television broadcasting became the model for other Arab states. The leadership of Jamal Abd al-Nasir and Anwar al-Sadat profoundly influenced other Arab and Third World leaders. And the demonstrations in Cairo ' s Tahrir Square became the iconic movement for the so-called “ Arab Spring ” in the rest of the Middle East. This fourth edition of Historical Dictionary of Egypt covers its history from its emergence as an independent actor during the reign of Ali Bey (1760-1772) up to and including the first two years of the Arab Spring (February 2013). This is done through a chronology, an introductory essay, appendixes, and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on of persons, events, institutions, political groups, economic and social conditions, policies, relationships with other countries, ideas, religions, ideologies, and commodities relevant to the modern history of Egypt. This book is an excellent access point for students, researchers, and anyone wanting to know

The colour and shade of dyed textiles were once as much an indicator of social class or position as the fabric itself and for centuries the recipes used by dyers were closely guarded secrets. The arrival of synthetic dyestuffs in the middle of the nineteenth century opened up a whole rainbow of options and within 50 years modern dyes

had completely overturned the dyeing industry. From pre-history to the current day, the story of dyed textiles in Western Europe brings together the worlds of politics, money, the church, law, taxation, international trade and exploration, fashion, serendipity and science. This book is an introduction to a broad, diverse and fascinating subject of how and why people coloured textiles. A fresh review of this topic, this book brings previous scholars' work to light, alongside new discoveries and research.
