This book presents essential research on a class of environmentally friendly alkylphosphonate herbicides. This class of herbicides acted as a competitive inhibitor of the pyruvate dehydrogenase complex (PDHc) to control weeds. The bioreasoning and systematic approach, from basic research to field tests of candidate compounds, are introduced. The basic research covers the molecular design, chemical synthesis, biological activities evaluation, structure-activity relationship analysis and structural optimization. Subsequently, the book reviews the biochemistry of PDHc inhibitors, the selectivity between mammals and plants, and the mechanism of herbicidal activity of novel alkylphosphonates as selective PDHc inhibitors. Field trials for selected alkylphosphonate candidates as herbicides are also included. This book provides a sound basis for the rational design and development of novel herbicides as effective PDHc inhibitors with good enzyme-selective inhibition of plant PDHc between mammals and plants. These studies take full advantages of the low toxicity and low residual impact of selective PHDc inhibitors to design an effective and environmentally friendly herbicide. This book is based on twenty years of research on alkylphosphonates and phosphorus-containing PDHc inhibitors, and demonstrates how to develop these PDHc inhibitors as an effective and "green" herbicide candidate. film—Aboriginal Canada Revisited draws a portrait of the current political and cultural position of Canada's Aboriginal peoples. While lauding improvements made in the past decades, the contributors draw attention to the systemic problems that continue to marginalize Aboriginal people within Canadian society. From the Introduction: "[This collection helps] to highlight areas where the colonial legacy still takes its toll, to acknowledge the manifold ways of Aboriginal cultural expression, and to demonstrate where Aboriginal and non-Aboriginal people are starting to find common ground." This book investigates the nature of the alphabet as a medium of communication. The general thesis is that writing is not a merely transparent or empty item like air or glass; rather, the alphabet is both modifier and enabler of meaning itself. The book investigates the general implications of this thesis.
