You are not what you think you are. New research is transforming how we understand ourselves—from a singular 'self' to a vast cooperative, co-dependent and collaborative network of cellular environments and ecologies—a microcosm within. From this unique perspective, a startling revision of evolutionary theory unfurls. Sharply reasoned and certain to be controversial, *The Microcosm Within* takes its readers on a sweeping scientific journey that reorganizes our thinking about our biological selves, evolution, and extinction. Darwin has dominated evolution for over a century. But many issues remain puzzling—What is the origin of self-sacrifice? Does natural selection really

account for evolution? Why is homosexuality commonplace in the animal kingdom? Why were the arms of Tyrannosaurus Rex so small? Why do some species go extinct yet others endure? *The Microcosm Within* offers intriguing and profound answers by exploring our extraordinary world of cellular consciousness, connections, and collaboration. Current research has unexpectedly revealed that all cells and microbes have elemental cognition and a previously unappreciated capacity for discrimination and awareness. From these faculties, cooperative natural genetic engineering is enabled; and it is from this starting point that biological complexity evolves. *The Microcosm Within* illuminates how immunological factors dominate evolution and extinction. Biology and evolutionary theory will never be the same.

Whatever your goals or your level of fitness,

this book offers you a plan to make you look and feel great 24/7. I've tried every workout and fad diet so you don't have to. As a former PE teacher, athlete, personal trainer and now one of the biggest fitness YouTubers in the World (a.k.a an absolute weirdo who films themselves doing stuff), the most common question I get from followers and even people in the street is, 'How do I get a body like yours?' People will almost whisper it, as if I'm going to usher them into a dark alleyway and reply with some kind of mystical secret. Like they're expecting to be told that they need to drink 263ml of maple syrup three times a day whilst reading the complete works of Shakespeare to their dog. Other times they seem to want me to reveal a protocol of supplements, with an inference that I must be taking steroids or other drugs, because having a good body without chemicals is now seen by some as almost impossible. It's not. This book is my attempt to shatter all of those myths and give it to you entirely straight. It is about understanding how to live your life in a more healthy, sustainable and happy way-and how to maintain that forever. And I'm not talking about becoming a monk and only eating lettuce. If you want to eat McDonald's, go for it. Eating crappy food doesn't make you fat and by the time you're done with the book you'll understand why. I want to arm you with your own set of tools so that you can tailor my methods and experiences to you and your own

unique situation.
